Volodymyr Dahl East Ukrainian National University

invites to

International Conference ***Policy – Business – Science – Education*** **Sustainable Poultry Farming in Ukraine**

October 17, 2024

Online in Zoom

Co-funded by the
Erasmus+ Programme
of the European Union

Funded by the European Union. Views and opinions expressed are however those of the author(s) only and do not necessarily reflect those of the European Union or the European Education and Culture Executive Agency (EACEA). Neither the European Union nor EACEA can be held responsible for them.

Introduction

Ukraine is aiming at full membership in the European Union. Therefore, for the Ukrainian poultry sector – besides recovery from the Russian war of aggression – the adaptation to EU standards and regulations will determine but also be a major challenge for its future development.

In this process transformation towards sustainable production systems considering aspects of animal welfare will be of high importance not only for agricultural producers, processing companies and trade organisations, but also for decision makers in policy, research and education related to the field of poultry production.

The International Forum aims to highlight relevant issues of sustainable Poultry Farming and animal welfare, which are important for understanding of current trends and future developments in the industry.

The discussion with recognized international and Ukrainian experts will focus on specific topics that are important for specialists from farms, managers at various levels, as well as scientists.

The forum will feature interesting plenary and specialized sessions, followed by a panel discussion.

Conference languages are Ukrainian and English. Simultaneous interpretation will be provided during the online sessions.
